ON THE LEDGER.**

Tide is the merit-based on-ramp to trading on the XRP Ledger. Free to learn, paid by results, live on mainnet.

PROBLEM

A generation is learning to trade by losing money. Every place it could practise is a dead end.

CRYPTO OWNERS WORLDWIDE

741 M

49 % of Gen Z plan to buy some this year. Their first instrument is a perp, not a stock.

RETAIL ACCOUNTS THAT LOSE MONEY

74 to 89 %

The warning every EU broker must print. \$150 B liquidated in crypto in 2025.

SIMULATORS THAT LEAD SOMEWHERE

0

School games end at a score. Exchange demos end at "deposit". XRPL apps start at "connect a funded wallet".

THE UNLOCK

We give every learner a funded XRPL account. It costs us \$1.55.

Our users come from a lesson, not from an exchange. Six steps and real money stand between a beginner and lesson one on XRPL: **a wallet-and-deposit wall is a paywall on a free school.** So Tide pays the entry, and the reserve stays in the learner's balance.

TIDE, PER LEARNER

\$1.55

1.21 XRP. Becomes the user's balance.

ROBINHOOD, BEST-EVER CAC

\$15

Per funded account. Coinbase pays \$10 per referral.

01 ~~Install a wallet app~~

02 ~~Write down a seed phrase~~

03 ~~Open an exchange account, pass KYC~~

04 ~~Buy XRP~~

05 ~~Withdraw it to the wallet~~

06 ~~Lock 1 XRP as reserve~~

TIDE One click. The account exists, funded, encrypted, and it is yours.

WHY NOW

The rails just arrived. The crowd did not.
The first product that turns learners
into XRPL accounts owns the on-ramp.

ACCOUNTS TRADING THE XRPL DEX PER DAY

1,111

Down 40 % in a year, while the ledger runs 2.44 M transactions a day. Institutions came. Retail did not.

RLUSD, SEPT 2026

\$2.38 B

A dollar quote worth trading, a \$1.25 B prime broker, \$3 B+ of tokenised assets, all in eighteen months.

HYPERLIQUID REVENUE, 2025

\$844 M

The instruments beginners meet went mainstream. Nobody teaches them. And MCP made agents first-class traders.

MARKET

15 million beginners who would try a free simulator. Two proven end states worth hundreds of millions each.

SERVICEABLE MARKET, PER YEAR

≈ \$180 M

15 M beginners × \$12 blended revenue per user (rake, coach, evaluations). Bottom-up, assumptions on the slide.

END STATE 1 · FUNDED TRADERS

\$329 M

FTMO's 2024 revenue selling evaluations, \$62.5 M net profit, on a 5 to 14 % pass rate.

END STATE 2 · THE VENUE

\$844 M

Hyperliquid's 2025 revenue on about \$3 T of perps, built by a crowd that trusted it.

BUSINESS MODEL

Free to learn. We earn when the score has consequences.

REVENUE LINE	WHEN	UNIT ECONOMICS (ASSUMPTIONS)	BENCHMARK
Tournament buy-ins	Now	8 % rake on a \$20 buy-in, 2 tournaments a month: \$3.20 per competitor per month	Poker tournaments take about 10 %
AI coach	Q4 2026	\$8 a month, 5 % of monthly actives	Duolingo converts 9.2 %
Classrooms, hosted competitions	Q4 2026	\$5 per seat per semester; 5 % fee on hosted prize pools	1.3 M students a year in three US school simulators
Funded-trader evaluations	H1 2027	\$99 per evaluation, 2 % of learners a year	FTMO: \$155 to \$1,080 per evaluation
The Tide DEX	2027	2.5 bps net on perp volume; spot on the native DEX stays free	Hyperliquid: about 2.9 bps

WHY WE WIN

Nobody else can end the simulation on a public ledger, and nobody else wants to.

UNFAIR ADVANTAGE 1

The diploma is an XRPL account

Funded, with a soulbound proof of first trade and results paid on the ledger. A CEX demo ends in a deposit to the CEX. TradingView ends in a broker referral. Neither can end on a neutral ledger.

UNFAIR ADVANTAGE 2

The evaluation engine already runs

One rule book for humans and AI agents, enforced by the server: max capital, daily loss, trades, leverage, kill switch. Funded-trader firms sell opacity; we sell a public audit trail.

UNFAIR ADVANTAGE 3

Zero to the native DEX, no exchange in between

No KYC, no purchase, no swap fee, every transaction tagged. Built on primitives that have been on mainnet for years. The ecosystem funds this; no exchange will.

The code is copyable. **The corpus is not:** track records on the ledger, outcome data from lesson one to funded account, cohorts and classrooms. It compounds with every learner.

VISION

Every trader on XRPL starts on Tide. The school builds the crowd; the crowd gets the venue.

Hyperliquid proved a venue is not a matching engine, it is a crowd that trusts it. Tide trains the crowd first, funds the best of it, then gives it a venue: **TideTrade, the perpetuals exchange of the XRP Ledger.**
